SUMMARY

Results-driven Java Backend Developer skilled in building production-ready systems using Spring Boot, Spring Security, and Hibernate/JPA. Delivered ~40% improvement in security reliability and ~30% reduction in debugging time via RESTful API design and RBAC implementation. Foundational knowledge of microservices and Docker. Seeking an entry-level backend role to apply strong Java fundamentals and grow in scalable system design.

SKILLS

Programming	Java (Core + OOP), JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks	Spring Boot 3.x, Spring Security, Hibernate/JPA, React.js, Tailwind CSS, Microservices (Foundational)
Databases	MySQL, JDBC
API & Architecture	RESTful APIs, JWT Authentication, RBAC, MVC Architecture, Layered Architecture
Version Control	Git, GitHub
Build Tools	Maven
App Servers	Apache Tomcat (Embedded via Spring Boot)
DevOps	Docker (Foundational), CI/CD - GitHub Actions (Familiar), Jenkins (Familiar), Kubernetes (Familiar)
Tools & IDEs	IntelliJ IDEA, VS Code, Postman, Chrome DevTools
Concepts	OOP, DSA (Basic – Java), SOLID Principles, Design Patterns
Soft Skills	Team Leadership, Problem Solving, Communication, Collaboration

ACHIEVEMENTS

2nd Prize — Hackathon Winner (2026) | College of Engineering Bhubaneswar

- Awarded official Prize Certificate for strong frontend and problem-solving skills.
- Collaborated in a team and presented the solution to a panel of judges.

PROJECTS

Financial Data Processing and Access Control Backend

Java · Spring Boot 3.x · Spring Security · JWT · Hibernate/JPA · MySQL · Maven · REST APIs

- Developed a secure backend system using Java and Spring Boot 3.x with optimized API performance for structured financial data.
- Implemented JWT-based authentication, improving security reliability by ~40% and reducing unauthorized access risk.
- Designed RBAC (ADMIN, ANALYST, VIEWER) ensuring 100% controlled access to protected endpoints.
- Built RESTful APIs using layered architecture, reducing debugging time by ~30%.
- Managed versioning with Git/GitHub; packaged with Maven and deployed on embedded Apache Tomcat.

E-Library Management System

Java · Spring Boot · REST API · MySQL · JPA/Hibernate · Postman · Maven

- Designed and implemented 8+ RESTful APIs with HTTP status codes, request validation, and error handling.
- Designed MySQL schema using JPA/Hibernate supporting 3 modules — inventory, user management, and transactions.
- Applied MVC architecture across 3 layers; validated all APIs with Postman across 10+ test scenarios.

AI Surveillance and Face Recognition Security (Hackathon Project)

Python · OpenCV · Face Recognition Libraries

- Built a real-time AI-powered surveillance system with face detection and recognition capabilities.
- Collaborated in a team and presented the solution to judges, demonstrating strong problem-solving skills.

INTERNSHIP

Frontend Development Intern — Codveda (2025)

- Built 5 fully responsive web pages using HTML5, CSS3, JavaScript, and React.js.
- Improved page load time by ~20% through optimized layout and design structure.

EDUCATION

B.Tech in Computer Science	College of Engineering Bhubaneswar	2023 – 2027	CGPA: 7.5
